Regarding the drawings, they are, in fact, at times illegible. For purposes of the election requirement which follows, the Examiner was at times forced to guess at the numbering of the Figures as well as reference numerals in the Figures. If applicants posses a set of drawings with darker reference numerals and complete numbering corresponding to the numbering found on page 8, line 16 - page 10, line 2 of the specification, they should be submitted in response to this office action.

Applicants argue that the term "biopharmaceutical product" makes what is otherwise an inanimate container with a heat exchanger in it patentable by virtue of the feature of the material intended to be conditioned.

It is respectfully submitted that the patentability of an apparatus cannot be predicated on a new use of what is otherwise an old apparatus. This is very old case law. See Brown v. Piper 91 U.S. 37, 23 LED.200 (1875), and Roberts v. Ryer 91 U.S. 150, 23 LED 267 (1875). See In re Thuau 57 USPQ 324 (CCPA 1943) for the leading new case and Ex Parte Masham 2 USPQ2d 1647 (BPAI 1987).

This application contains claims directed to the following patentably distinct species of the claimed invention: first species of Fig. 1 and 2,

second species of Fig. 4,

third species of Fig. 5,

fourth species of Fig. 6,

fifth species of Fig. 7,

Art Unit: 3743

sixth species of Fig. 8,
seventh species of Fig. 9, (more than one, maybe),
eight species of Fig. 10,
ninth species of Fig. 11 and 12,
Tenth species of Fig. 13,
eleventh species of Fig. 14 and
twelfth species of Fig. 15 and an in determinant number of additional
species illustrated in Figure 16-19.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims appear to be generic.

In the event applicants elect any figure which has numerous variants associated with it, a particular variant must be enumerated.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
